Ref: confirmation of RENOLIT origin & Partnership

I herewith confirm that the company RENOLIT has selected the company VECTA Design, based in Estonia, as it's preferred partner in Lithuania.

We herewith take the opportunity to warn all stakeholders and authorities involved to pay special attention to ensuring that only the genuine and original RENOLIT quality will be checked and accepted in the offer and eventually the installation.

This explicit advice is based on recent abuse found in respect to the use of no recent RENOLIT intellectual property in combination with the offer of non-original, ex-EU, alternative material with different characteristics and properties.
The original RENOLIT stretched ceiling film has a width of max 200cm and should be technically welded afterwards.

We kindly advice you to contact VECTA Design Ltd. in case of any doubts regarding the original RENOLIT quality offered.

Best regards,

RENOLIT Benelux BV
